✏ I LOVE PROGRAMMING

Coding is a means of expressing myself. It is happy to create things and watch people use them. That is my joy in coding.

💼 WORK EXPERIENCES

EMPLOYMENT HERO   NOV 2016 -
Senior Developer (Ruby on Rails)

Apply principles of software engineering and communications to the requirements, design, development, maintenance, testing and evaluation of the system that make the services working substantially and reliably.
- I joined the company at its very early stages when they had 12 developers, and now they have about 200 developers.
- A leader with management skills for a team of five (including junior and intermediate members).
- The ability to work with the product team on brainstorming and analytic requirements.
- Planning, estimating, and setting deadlines.
- Experience with working with legacy code, microservices.
- Has product mindset
- Integrating system with recruitment system, external payroll (keypay, xero) and staffing agency system

AGILITYIO COMPANY   AUG 2012 - JULY 2014
Full-stack Developer (Ruby on Rails & iOS)

- Design, build, maintain efficient, reusable, and reliable Ruby code
- Experience with Rails, along with other common libraries
- Analyze client requirements to develop functional, technical software requirements and build a release plan
- Experience writing and using RESTful APIs to connect iOS applications to back-end services

LOGIGEAR VIET NAM   MAR 2012 - AUG 2012
Test Automation

- Analyzing users stories and/use cases/requirements for validity and feasibility.
- Design and develop automation scripts

🏆 PROJECTS

1. http://jamesdelivery.com.br/ James application
   Languages: ReactJs, Ruby on Rails
2. http://iamcookiejar.net/ CookieJar application
   Languages: Swift, Ruby on Rails

🎓 EDUCATION

DA NANG UNIVERSITY OF TECHNOLOGY   SEP 2007 - JUN 2012
Major: Software Engineer
